

# April

class newsletter

This month, the class will begin the *Cameras* study!

Throughout this study, the class will learn how the world of technology has evolved over time! With such improved, innovative tools, the children will learn how people use cameras to document and capture photos and videos of everyday lives. They will discover how cameras help communicate in real time and create art, all while engaging with them as photographers themselves! Together, we will investigate how to use various types of cameras and experiment taking good pictures and videos.

Sincerely,  
Ms. DiRenzo

ShowerS
